Re. Teaching on postgraduate Breathing, Performance and Rehabilitation paper

Dear Glenn,

Thank you once again for your excellent session on 'Breathing Retraining and the Buteyko Institute Method' that you delivered as part of our postgraduate Breathing, Performance and Rehabilitation paper last weekend. The informal feedback from the students was very positive, and from our point of view, the session really enhances the rest of the programme. So thank you for giving up your valuable time and offering the students something that we are sure will be invaluable learning and experience for them in the future.

Yours sincerely
